BSc (Hons) in Pharmaceutical and Medicinal Science AU373

Congratulations on being offered a place of study in the Department of Life and Physical Sciences at ATU Donegal. The Department of Life and Physical Sciences is a vibrant, exciting department in the Faculty of Science and Health. It is equipped with up-to-date equipment and state-of-the-art laboratories. Recent reports indicate that demand for science skills is expected to remain high within the high- tech manufacturing sectors and as a result of increased demand for healthcare and healthcare products. Now is a good time to be taking a course in science and science related areas.

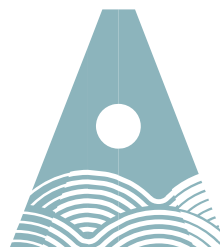

This is a full-time programme with classes taking place Monday-Friday from 09.30 17.30. Attendance at all lectures, practicals and site visits is recorded and monitored. If a student has attendance less than 75%, they will be invited to attend a meeting with the Head of Department.

As part of your programme of study you will take both theory and practical classes. Practical classes are an essential part of your programme as they put into practice much of the theory you have been taught in class. As a Department, we place considerable emphasis on this aspect of our programmes of study as employers require graduates to have up-to-date practical skills. Students are required to wear protective clothing when working in the Science labs. Lab coats are available from the Campus SU shop.

Once again congratulations on securing your place in the Department of Life and Physical Sciences. On-Campus Induction for Department of Life and Physical Sciences Science Students takes place on **Thursday 14th September**. You will receive information about your Class Group and Timetable at Induction.

I look forward to meeting you then.

Dr Kim McFadden
Head of Department of Life and Physical Sciences
